PROPLATE Series

The advanced Hydro-Gel improves conductivity, lowers impedance, eliminates residue and minimizes the risk of pad site burn.

1 Optimal Adhesive Strength

With advance technology and research, we've improved the adhesion between the skin and the grounding pad.

2 Lower Impedance

With optimal Hydro-Gel, the ProPlate can safely maintain high current density

3 Residue-Free

Hydro-Gel provides maximum adhesion and leaves zero residue on the patient, mess free!

ESU Grounding Pad

PROPLATE
Series

Over-sized Gel

Minimizes Risk of pad site burns

PROPLATE ESU grounding pads are designed and manufactured using an advanced gel overlay system to reduce the possibility of edge burn or bite.

Cable			
Model	Specification	Packaging Info	Image
RCV300	Cable for use with all ARM-equipped and Valleylab REM-equipped generators. Enables pad-to-patient contact quality monitoring 3m	1 each	
RCE300	Cable for use with Erbe and Elmed generators 3m	1 each	

PROPENCIL Series

Our ESU Pencil is designed with surgeons in mind, with unique designs allowing more flexibility and support we assure comfort during long procedures. BioProtech's ESU Pencil are easy to use and extremely durable.

1 Rocker or button switch

The Ergonomic Pencil is available with a standard stainless steel or ceramic coated blade in either rocker or button switch configuration.

2 Ergonomic design

Has ergonomic design which assures surgeons comfort during long procedures.

3 Non-slip handle

Ergonomic Pencil has a non-slip handle that has an engraved body provides a positive, secure grip during wet procedures.

Ergonomic Pencil

- ▶ Unique design fits in your hand that is helpful to reduce your fatigue
- ▶ Engraved body for surgeon to secure the grip

Ergonomic Design & Non-Slip Handle
